## SKILLS

---

- React JS, Next.js, WordPress, WooCommerce, Elementor, C++, Python, C#, JavaScript, [asp.net](https://asp.net), .Net Core
- Web Development, Front-End Design, Search Engine Optimization (SEO), Website Security (Firewalls, SSL Encryption), Database Management (MS SQL), MongoDB, System Configuration, Troubleshooting, Customer Service

## WORK EXPERIENCE

---

### **Digital Data Dimensions:** *Software Development Intern*

10/2024 – 12/2024

- Developed and maintained web applications using .NET Core, contributing to scalable backend solutions for data-driven projects, enhancing system performance and reliability.
- Utilized MS SQL and MS SQL Server to design and optimize database schemas, write efficient queries, and support data management for business applications.
- Collaborated with development teams to implement front-end features using React JS and Next.js, ensuring seamless integration with .NET Core backends for responsive user interfaces.
- Assisted in troubleshooting and resolving software issues, leveraging skills in C# and MS SQL from ongoing diploma training to enhance application functionality and user experience.
- Applied Agile methodologies to participate in sprint planning and code reviews, fostering teamwork and iterative development in a dynamic environment.
- Supported system configuration and testing of applications, ensuring compatibility with MS SQL Server databases and adherence to project requirements.

### **Rafrat Bim & Engineering W.L.L :** *WordPress Developer & Web Admin*

04/2023 – 12/2024

- Created and secured responsive websites using SSL and firewalls.
- Customized WordPress themes and improved UI/UX for engineering projects.
- Supported IT needs including domain, hosting, and content updates.
- Managed backups and handled minor troubleshooting across platforms.

### **AcademicArabia :** *WordPress Developer & Frontend Designer*

01/2021 – 10/2022

- Developed and maintained client websites using WordPress, Elementor, and custom themes.
- Implemented on-page SEO strategies to boost site visibility.
- Assisted with technical troubleshooting and plugin compatibility issues.
- Provided basic support to non-technical users during website handovers.

### **Lumen PC's :** *WordPress Designer & Developer*

02/2020 – 08/2021

- Set up and customized WordPress themes and plugins for local business clients.
- Designed interactive front-end features to improve user engagement.
- Implemented SEO and security best practices including SSL setup and firewalls.
- Provided basic IT support and trained clients on CMS usage.

## EDUCATION

---

**Arab Open University** || Kingdom Of Bahrain  
September 2021 – June 2025  
*BSc Hons in Information Technology & Computing*

**Clara's College Of Commerce** || Mumbai, India  
January 2019 – August 2021  
*Commerce With IT*

## CERTIFICATIONS

---

**Diploma in Web Development (HTML, CSS, Dreamweaver, Adobe Photoshop, FTP)**  
Issuing Organization: *Compufield*  
2020 – 2021

**Certificate in C++ & Python**  
Issuing Organization: *Compufield*  
2020 – 2021

**Meta Front-End Developer Professional Certificate**  
Issuing Organization: *Meta (via Coursera)*  
2022 – 2023

**Diploma in C#, .NET Core & MS SQL**  
Issuing Organization: *Compufield*  
2024 – 2025

## PROJECTS

---

### University

#### ***AdVision (AI-Powered Ad Analysis WebApp)***

- Developed an AI-powered web application for ad analysis and design optimization using **Next.js** and **React JS**, delivering responsive front-end interfaces.
- Integrated APIs to enable data-driven functionality, showcasing skills in modern web development and potential backend connectivity with databases like **Supabase (Postgres)**.
- Applied Agile principles to manage project milestones, ensuring timely delivery of a scalable and user-focused solution.

#### ***CiteMate (Citation Generation Tool)*** 2024

- Built a web application to streamline citation generation using **Next.js** and **React JS**, providing an intuitive interface for academic users.
- Leveraged **Supabase** for database management to store and retrieve citation data, ensuring efficient data handling and scalability.
- Integrated external APIs to enhance citation formatting functionality, demonstrating proficiency in API integration and front-end development.

## ***AOUGPAPredictor (GPA Prediction Tool)***

*2024*

- Developed a web application to predict GPA for university students using **Next.js** and **React JS**, delivering a user-friendly and responsive interface.
- Utilized **Supabase** for database management to store academic data and prediction models, enabling accurate and real-time calculations.
- Implemented predictive algorithms via API integration, showcasing skills in data-driven web development and system optimization.
